**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, drawn to a reflector for a light source, classified in Class 362, Subclass 296.
  - II. Claims 9-19, drawn to a lighting structure with a translucent/transparent modifier, classified in Class 362, Subclass 307.
  - III. Claims 20-28, drawn to an illumination system with a reflector defining a first surface at least in part in the shape of a parabola, classified in Class 362, Subclass 347.
  - IV. Claims 29-35, drawn to an illumination system with a plurality of light emitting diodes, classified in Class 362, Subclass 247.
  - V. Claims 36-37, drawn to a light based measurement system, classified in Class 362, Subclass 276.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III, IV, and V are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed since Invention I recites a particular reflector not specifically taught by the other Inventions. In addition,

Art Unit: 2875

Inventions II, III, IV, and V are all different combinations incorporating a reflector (Invention I), as shown in the separate classifications above. The subcombination has separate utility such as collimation of illumination via reflection, which may be incorporated in a variety of light assemblies (i.e., Inventions II, III, IV, and V).

### ***Conclusion***

The separate inventions, as described above, would require multiple and distinct searches, thus, placing an unnecessary burden on the examiner. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason M. Han whose telephone number is (571) 272-2207. The examiner can normally be reached on 8:00am-5:00pm.
